Press Release

Nexcor Food Safety Technologies, Inc. Announces Strategic Collaboration with Charm Sciences Inc. for *KLEANZ Swab Connect*.

Buford, Georgia – February 2, 2021 – Nexcor Food Safety Technologies, Inc. (Nexcor) and Charm Sciences Inc. (Charm) have joined forces to deliver Swab-Mapping technology to food and beverage manufacturers worldwide.

The latest collaboration of the two organizations' industry leading, multi-award winning solutions will make it easier for operations to have complete, risk mitigating food safety execution. KLEANZ Food Safety and Sanitation Management solution (KLEANZ) incorporates heat mapping and other advanced data aggregation tools to track and trend swabbing data into useful information for sanitation efforts.

Using KLEANZ in conjunction with Charm's ATP swabbing technology (Charm PocketSwab Plus, WaterGiene, AllerGiene, FieldSwab, Peel Plate, and E*Colite), will provide manufacturers significantly enhanced food safety, sanitation, and hygiene management. Expected outcomes for Nexcor's clients are simplified verification and validation of food safety efforts as well as risk mitigation of microorganism contamination. The collaboration of *KLEANZ Swab Connect* and Charm products is expected to deliver improved financial and operational efficiency to clients.

"There is an enormous opportunity for us to help our clients to mitigate risk, increase efficiency, and save money. With the combined knowledge of our teams, we will accelerate our clients' corporate initiatives and drive higher levels of insights for more informed decision-making.", said Robert Burgh, President of Nexcor Food Safety Technologies, Inc.
