What is KLEANZ?

The Complete Food Safety Compliance and Sanitation Management Execution Tool

KLEANZ is a highly configurable software system designed to encompass all Food Safety Compliance and Sanitation Management actions, information, and documentation within food and beverage manufacturing. KLEANZ is the only complete food safety solution that is a repository for documentation *and* a tool for producing reports and tracking trends. This includes anything that affects or intends to affect Food Safety in a facility.

KLEANZ is focused on producing information that drives continuous improvement, risk mitigation, and resource management efforts. KLEANZ has three major levels of functionality:

KLEANZ Mobile - Data collection on the Plant Floor

- Perform inspections, schedule & log work tasks, and record non-conformances
- Assign work on the fly and review the status of each task
- View assigned work including the related SSOPS, photos, Critical Control Points, and more
- Available for iOS, Android, Win10 devices

_____

KLEANZ Desktop - A Living Data Repository

- Eliminate siloed information by keeping all Food Safety documentation in a single system
- Manage resources by planning MSS labor, employee assignments, and schedules
- Track training and certification of your team members
- Report all Food Safety actions for 3rd party audits, corporate compliance, and industry standards

_____

KLEANZ Dashboard - Track and Trend your Food Safety

- Ensure corporate consistency by tracking Key Performance Indicators (such as Food Safety Hours completed, Allergen Changeovers, Corrective Actions, Daily GMPs, Pre-Flights, and more
- Measure the performance of your organization by facility, business unit, region, products produced, and more
- Create automated email/SMS reports based on specific tasks, date ranges, employees, audits/compliances, and more
