

## Keeping You Audit Ready Every Day

The KLEANZ Family of Services is the only food safety solution trusted by the food and beverage industry to facilitate successful, streamlined audits. We are there for your team when government, customer, GFSI, or other types of audits occur. KLEANZ gives you easy access to your food safety documentation with detailed reporting.

Our food safety partners know their regulatory visits are covered **24/7, 365** days a year.

### Always Have the Right Answer When It Matters Most

**PLAN** for all audits by documenting *once* and being able to pull reports at a moment's notice.

**EXECUTE** corrective actions instantly when the auditor finds a non-compliance, or an event occurs. Ensure everything that affects or intends to affect food safety is documented in one place.

**TRACK** every food safety action an auditor could ask for in one, highly configured system.

KLEANZ is supported by industry veterans with decades of food safety experience. We know what it takes to show auditors what *you want* and what *they need*. And we're always just a phone call away for real-time support.

Sanitation management relies on *hundreds to thousands of actions* to be performed and documented each day. Using the wrong tool (maintenance systems, spreadsheets, or paper forms) to capture this breadth of information falls short. KLEANZ is the right tool for simplifying audit preparedness with expert guidance always available.
