

KLEANZ Swab Connect

The industry leading and multi-award winning KLEANZ Food Safety and Sanitation Management solution streamlines ATP swabbing and microbiological risk mitigation through the KLEANZ Swab Connect feature.

Collaboration between Nexcor Food Safety Technologies and several of the largest, global ATP swab manufacturers delivers a robust feature set of swabbing execution and management. KLEANZ Swab Connect incorporates heat mapping and other advanced data aggregation tools to track data trends for effective Food Safety.

KLEANZ Swab Connect simplifies verification and validation of sanitation and Food Safety efforts. Instantly mitigate the risk from a swab failure by scheduling the appropriate corrective actions from the plant floor in real-time. KLEANZ drives financial and operational efficiency.

Planning

- Visual Mapping and Swab Task Assignments
- Automatic Scheduling and Alerting
- All Food Safety, Sanitation, and Hygiene Management in *One Place, In Real-Time.*

Execution

- Instant Data Aggregation
- Pass/Fail and Configured Parameters
- Issue Corrective Actions
- Enhanced Visibility

Tracking

- Report on Swab Data
- Root Cause Analysis of Hot Areas
- Track Sanitation Effectiveness Over Time
- Continuously Improve Food Safety
